

## Planning on Breeding in 2015?

Here's a Pre- Arrival checklist to help you get started:

- Ensure stallion contract is in place and all fees are paid or credit card on file with stallion owner.
- Ensure West Wind Veterinary Hospital has all your stallion contact information. Name of Stallion, stallion location, phone number, fax, email etc
- Ensure West Wind Veterinary Hospital has the stallion location on their Import Permit (if stallion or frozen semen is outside of Canada).
- Ensure your mare or stallion is vaccinated against WEE, EEE, Tetanus, West Nile, Influenza and Rhino at least 2 WEEKS Prior to arriving at West Wind Veterinary Hospital.
- Deworm your horse 1 – 2 weeks prior to arriving at West Wind Veterinary Hospital.
- Ensure West Wind Veterinary Hospital has your contact information and your horses information ie Registered Name, DOB, Registration Number (copy of registration papers is best)
- Ensure your horse is in good breeding body condition (ie not too fat or too thin).
- West Wind Veterinary Hospital can deworm, vaccinate and perform dental procedures while your horse is at West Wind Veterinary Hospital but best if done well before breeding.
- Call West Wind Veterinary Hospital a week before expected breeding date to ensure all is in order.
- Ensure your horse is healthy prior to arriving at West Wind Veterinary Hospital.
  
- Once your horse is ready to go home, prepare an area for a 1 -2 week isolation from other horses to protect your other horses from potential disease as per the AbVMA Equine BioSecurity Guidelines.
